

## Seasonal Changes Song

### Seasons

Let's talk about seasons, there are four in a year  
There are many reasons how you'll know they're here

The first season is Spring

Spring is the season when the flowers grow  
The trees are in blossom and the lambs say hello  
Let's talk about spring when the flowers grow  
Let's talk about spring and the lambs that sing Bah

The next season is Summer

Summer is the season when the weather's hot and fine  
The days get much longer in the summer time  
Let's talk about summer when the days are long  
Let's talk about summer in this season song

The next season is Autumn

Autumn is the season when the trees turn red and brown  
There's conkers on the branches and the leaves fall on the ground  
I'm talking 'bout Autumn when the leaves all fall  
I'm talking about Autumn and that's not all

The next season is Winter

Winter is the season that brings the frost and snow  
The days are much shorter and the cold wind blows  
Let's talk about winter when there's from and snow  
Let's talk about winter, when the cold winds blow

Let's talk about seasons, there are four in a year  
There are many reasons how you'll know they're here

### Seasons

## **Weather Terms**

Let's talk about weather and all it's different forms  
There's lots of facts about weather for you to learn

Weather describes conditions like sun, snow, wind and rain  
How many different types of weather can you name?  
Let's talk about weather: sun, snow, wind and rain  
Let's talk about weather: thunder, lightning and hail.

### **Humidity**

Humidity describes water vapour in the air  
Liquids move freely, just like water, they get everywhere  
What's vapour in the air called? Humidity  
Tell me what do liquids do? They move freely

### **Temperature**

Degrees of heat and cold are measured on a scale called temperature  
If you want to know if somethings hot or cold you can use a thermometer  
What's a scale of hot and cold called? Temperature!  
How do you measure if it's hot or cold? Use a thermometer.

Let's talk about weather and all it's different forms  
There's lots of facts about weather for you to learn

### **Weather**

## Clouds

Let's talk about clouds, they live in the sky  
They're made of water and tyre made of ice

Clouds may look like cotton wool or something fluffy and nice  
But clouds are actually made of water and ice  
Let's talk about clouds all fluffy and nice  
What are clouds made of? Drops of water and ice

On a clear day there are no clouds and the sky is blue  
When it's partially cloudy you'll some clouds but only a few  
Let's talk about clear days when the sky is blue  
When it's partially cloudy, you'll see a few

Sometimes the sky is overcast and grey  
This is because a blanket of cloud is hiding the blue skies away  
Let's talk about blue skies under blankets of cloud  
When it's grey and overcast, there are blankets of cloud.

Let's talk about clouds, they live in the sky  
They're made of water and tyre made of ice

Clouds

## Rain

Let's talk about rain and getting wet through  
Rain is water from the sky, that falls on you

Sometimes rain is heavy and sometimes rain is light  
Rains lots of drops of water that fall from the sky  
Let's talk about rain and how it makes you wet  
Little drops of water are called droplets

Sometimes it rains in showers and sometimes it pours  
When it's pouring really hard outside, it's best to stay indoors  
You can get really drenched in the pouring rain  
Better put your raincoat on to keep dry in the rain

An umbrella is another way to keep warm and dry  
You can use it when it's raining or when the sun is hot and high  
Let's put our umbrellas up, it's starting to rain  
Let's put our umbrellas up, to make a sun shade

Sometimes if you get very wet and cold It can make your body shiver  
This is when your body starts to shake, like excitement it makes you quiver  
Let me see you make your body shiver — shiver and shake brrr  
Let me see you make your body shiver — shiver and shake brrr

Let's talk about rain and getting wet through  
Rain is water from the sky, that falls on you

Rain

## Thunderstorms

Let's talk about thunderstorms, crashing thunder heavy rain  
Let's talk about thunderstorms, lightning bolts and hail.

Thunder is a loud trembling noise heard after a lightening flash  
Lightening is electricity that causes a thunderclap  
Let's talk about thunder - Let's make a loud clap  
Let's talk about lightening — An electric flash

Oh No! It's hailing now, hard pellets of frozen rain  
And here comes the thunder and lightning again  
Here comes the hail — balls of frozen rain (ouch)  
Here's the thunder and lightning — crash flash again!

Let's all run for safety, let's get out of the thunderstorm  
Let's stay out of danger and keep safe and warm  
Keep safe in a thunderstorm — stay safe and warm  
Keep out of danger — stay out of the storm.

Let's talk about thunderstorms, crashing thunder heavy rain  
Let's talk about thunderstorms, lightning bolts and hail.

Thunderstorms

## **Snow**

Let's talk about snow, soft clean and white  
Snow's fun for making snowmen and having snowball fights

Snow is soft frozen water that falls from the sky to the ground  
Snow is made from snowflakes where tiny crystals can be found.  
Now tell me what snow is — soft frozen water  
Who want to have a snow fight (ME!) don't think we oughta (Ahhh)

Crystals are tiny repeating patterns that make up a snowflake  
No two snowflakes are ever the same which I think is pretty great  
Now tell me what a crystal is — repeating patterns made of ice  
Shall we make some paper snowflakes — Yes that would be nice

Sometimes there are snowstorms, that's when it snows loads and loads  
And sometimes there's a blizzard when it snows and a strong wind blows  
What's it called when it snows loads? It's called snowstorm  
What's it called when there's wind and snow? It's called a blizzard

Let's talk about snow, soft clean and white  
Snow's fun for making snowmen and having snowball fights
